Make sure when you do your note cards, that you number the cards with one term on EACH card. When they are handed in, they must be in order with the word on one side and the definition on the other. Use ½ of a 3 X 5 file card please. DO NOT PUT MORE THAN ONE TERM ON A CARD

Vocabulary to Know
1. Psychology
2. Structuralism
3. Functionalism
4. APA
5. Introspection
6. Natural selection
7. Behaviorism
8. Psychoanalysis/psychoanalytic theory
9. Applied psychology
10. Behavior
11. Stimulus
12. Gestalt psychology
14. Unconscious & conscious
15. Humanism
16. Clinical psychology
17. Cognition
18. Cognitive psychology/perspective
19. Biological/Physiological psychology/perspective
20. Evolutionary psychology
21. Ethnocentrism
22. Developmental psychology
23. Social psychology
24. Experimental psychology
25. Personality psychology
26. Health Psychology
27. Forensic Psychology
28. Psychometrics
29. Counseling psychology

People to Know
59. Wilhelm Wundt
60. Edward Titchner
61. Stanley Hall
62. William James
63. Mary Whiton Calkins
64. Charles Darwin
65. Margaret Floy Washburn
66. Leta Stetter Hollingworth
67. John Watson
68. Ivan Pavlov
69. Sigmund Freud
70. BF Skinner
71. Carl Rogers
72. Abraham Maslow
73. Noam Chomsky
74. Jean Piaget
75. Herbert Simon
76. James Olds
77. Roger Sperry
78. David Buss
79. Martin Seligman
80. Participants/subjects
81. Data collection techniques
82. Journal
83. Experiment
30. Educational/School psychology  
31. Industrial & Organizational psychology  
32. Empiricism  
33. Psychiatry  
34. Positive Psychology  
35. Culture  
36. Hypothesis  
37. Variables  
38. Steps of Scientific Investigation  
39. Operational definition  
40. Naturalistic observation  
41. Survey  
42. Single & Double blind procedure  
43. Sample  
44. Sampling Bias  
45. Social desirability bias  
46. Ethical guidelines  
47. Frequency distribution  
48. Median, mean, mode  
49. Histogram  
50. Negative & positive skewed distribution  
51. Standard deviation  
52. Correlation coefficient  
53. Scatter diagram  
54. Statistical significance  
55. Meta-Analysis  
56. Null hypothesis  
57. Reactivity  
58. Descriptive Statistics  
84. Independent variable  
85. Dependent variable  
86. Experimental group  
87. Control group  
88. Extraneous variables  
89. Confounding variables  
90. Random assignment  
91. Random sample  
92. Descriptive/Correlational Research  
93. Case study  
94. Self-fulfilling prophecy  
95. Replication  
96. Population  
97. Placebo & Placebo effect  
98. Experimenter bias  
99. Statistics  
100. Central tendency  
101. Variability  
102. Frequency polygon  
103. Normal distribution (bell-curve)  
104. Correlation  
105. Positive & negative correlations  
106. Coefficient of determination  
107. Inferential statistics  
108. Response Set  
109. Halo Effect

**INTEGRITY POLICY**

*Please take note:* Research, homework, tests and written work must ultimately be done INDEPENDENTLY and work put in your own words unless otherwise instructed by your teacher. To avoid plagiarism, you must employ practices such as paraphrasing, citing other people’s words and concepts, and interpreting websites to draw NEW conclusions. **DO NOT CUT AND PASTE** material onto written work, PowerPoint presentations, posters, and handouts. Plagiarism is not something I take lightly and would not like to have to write you up according to the rules outlined in the student handbook. Any speculation of academic misconduct will be brought to the attention of administration immediately.
