Proper Hydration Information

Parents and athletes: Adequate hydration is CRITICAL to performance, stamina, recovery from injury as well as general well-being. Typical adolescent boys and girls are 70% and 60% water by weight.

Hydration Rules

- 1. Hydrate hours and days before you need it.
- 2. Hydrate often -- before, during and after exercise.
- 3. Water and sports drinks are fine before and during exercise.
- 4. Avoid carbonated drinks since they may promote dehydration.
- 5. Your thirst does NOT equal your body's need to replenish fluids. You need more than your thirst indicates.
- 6. It is essential for every teenager to drink at least 8 glasses of water a day while athletes need about <u>1-12oz bottle for each pound</u> sweated off.

Signs of Dehydration

- 1. Dehydration is cumulative. Do not fall behind with replenishing fluids.
- Signs include muscle cramps, headache, fatigue, continued weight loss, vomiting and lethargy. Darker than usual urine indicates possible dehydration.
- 3. Monitor your weight. Each day you should return to 90-95% of yesterday's amount. Rapid weight loss is water, not body fat.

Remember: proper hydration begins at home

Come to practice well hydrated and go to bed well hydrated

It is easier to stay ahead of dehydration than to catch up
